

HP Fibre Channel Transceivers

Maximum HP performance and reliability

HP Fibre Channel Transceivers offer maximum performance, reliability and compatibility for HP storage and computing products.

HP recommends using only HP's high quality fibre channel transceivers (SFPs) in HP SAN environments. HP Transceivers are qualified to plug and play across the entire HP SAN storage product family, including 3PAR, XP, EVA, and MSA platforms and with all HP Fibre Channel switches, routers, directors and blade server switches.

Designed for:

Customers that require the highest levels of connectivity performance and reliability from their HP SAN.

Features and benefits:

• HP quality, reliability and performance

HP transceivers are fully tested with HP hardware products to ensure optimum performance and reliability.

• Complete HP Fibre Channel product offering

HP offers a complete lineup of 16Gb, 10GbE, 8Gb, and 4Gb solutions in both short and longwave configurations, including a new HP Store Fabric 16Gb FC/ 10GbE Converged SFP+.

• Quick and easy installation

HP transceivers install easily (plug and play) and are automatically recognized by hardware systems upon insertion.

• Recommended for HP Port License Upgrades

HP Ports on Demand (POD) customers that require port upgrade licenses should use HP qualified transceivers in their expanded environment.

• HP warranty and support
