“The DIN DN-95358 PoE Switch is a 16-port 10/100/1000Mbps PoE + 2G Gigabit RJ45 +2 Gigabit SFP PoE switch. The PoE ports can automatically detect IEEE 802.3af/at-compliant Powered Devices (PDs) and supply them with power. Your network is able to extend power and data transmission via a single cable to locations where there are no power lines or outlets that you could use to install devices such as APs, IP cameras or IP phones and the like. The PoE switch offers a simple, cost-effective and non-blocking wire-speed performance with 11-inch metal form for rack installation in office or department networks.”
